

Daria Derzhaeva

QA Engineer

Almaty, Kazakhstan | +7 707 132 3745 | derjaeva160@gmail.com | [LinkedIn](#) | [Github](#)

SUMMARY

QA Engineer with 4+ years of experience testing complex web, backend, and API-driven systems in Fintech and enterprise domains. Specialize in exploratory testing, testing without detailed specifications, API/data flow validation, and reproducing hard-to-detect integration issues. Independently built UI and API test automation from scratch using Java, Python, Selenium, Allure, and AI-assisted development tools, reducing manual regression effort by 30%. Focused on AI-powered developer tools, code generation, refactoring, debugging assistance, and validating AI-generated code

SKILLS & LANGUAGES

Java | Python | AI tools | Selenium | Selenide | Cypress | Rest Assured | JUnit 5 | OOP | SQL | Postman | Allure | Docker | Jira | YouTrack | DevTools | Test Strategy | CI/CD | Functional Testing | Exploratory Testing | Regression Testing | Test Case Design | Bug Reproduction | Fix Verification | Testing Methodologies
English — Upper-Intermediate, Russian — Native

PROFESSIONAL EXPERIENCE

Jet Finance

Almaty, Kazakhstan

Top-9 financial institution in Kazakhstan, focused on digital financial products

QA Engineer & QA Lead (2024 – Present)

- Independently designed and built a UI and API test automation solution from scratch using Python, Selenium, Allure, and AI-assisted development tools, increasing regression coverage for critical workflows and reducing manual testing effort by 30%
- Accelerated automation implementation by using AI-assisted development tools for code generation, debugging, test data preparation, and repetitive QA tasks
- Improved regression reliability by stabilizing Selenium-based automated checks, enhancing Allure reporting, and reducing flaky test failures by 25%
- Tested features without detailed functional specifications by analyzing product behavior, business rules, API responses, logs, database records, and edge cases
- Led a team of 5 QA engineers, overseeing onboarding, task coordination, automation code reviews, and knowledge-sharing sessions, improving test design, debugging practices, and automation quality across the team

FinTechPro

Almaty, Kazakhstan

Top-15 online finance companies in Kazakhstan and the CIS

QA Engineer (2023 – 2024)

- Improved testing processes during task discussions, design mockups, and initial analytics, preventing the emergence of many bugs and speeding up development
- Reduced integration-related defects by 20% by investigating API responses, cross-system data flows, and data consistency issues in financial workflows
- Prepared a test suite for future automation, achieving 100% coverage of end-to-end test scenarios in collaboration with developers

Digital Region

Remote

IT company focused on digital public services and enterprise information systems

QA Engineer (2022 – 2023)

- Reduced repeated defects in frequently changed modules by approximately 15% through clearer defect documentation, focused regression testing, and fix verification
- Implemented a post-release validation process for system modules after releases, updates, and integration changes using regression and exploratory testing
- Reduced UI-related defects by 15% by analyzing layout, behavior, and consistency issues with HTML, CSS, and browser DevTools before release

IrTech

Remote

Software development company focused on web applications and enterprise solutions

QA Engineer Intern (2022 – 2022)

- Performed functional, and regression testing of web application features throughout the testing lifecycle
- Updated and structured test cases for core web application flows, improving regression coverage by 20%

PROJECTS

AI Assistant Java QA Suite — Pet Project | [GitHub](#)

Java-based QA project for evaluating AI-assisted coding features in developer tools

- Created Java scenarios and JUnit 5 tests for validating generated code correctness, edge cases, and behavior preservation

- Designed test scenarios and bug reports for code generation, refactoring suggestions, debugging explanations, and AI-generated Java code validation

EDUCATION & CERTIFICATIONS

Samara State University of Social Sciences and Education *Graduated with Honors*

Bachelor's Degree in Computer Science (2022)

QA Automation Engineer (Python) — Yandex Practicum (2024)

Java Developer & QA Automation Training — NoBugs (2025)
